

THE VALUE OF PERFORMANCE.

**NORTHROP GRUMMAN**

## **AC-208 Eliminator™**

*Armed Caravan Aircraft*

The AC-208 Eliminator builds on Northrop Grumman's battle-proven AC-208 Armed Caravan and offers customers a highly-capable and cost-effective reconnaissance and ground attack capability with a critical offensive and operational over-watch capability in the Counter-Insurgency (COIN) fight. The Eliminator is able to find, fix, identify, track, target, and engage emerging and time-sensitive targets with its 2.75" guided rockets and/or AGM-114 HELLFIRE™ missile payload, based on mission requirements.

### **Capabilities**

Armed over watch and strike capability with enhanced weapons configurations

Robust day/night intelligence, surveillance, and reconnaissance (ISR) solution

Northrop Grumman's exportable advanced targeting and fire control system

Reconfigurable weapons configuration  
-Dual Rail HELLFIRE™ Missiles (AGM-114); two missiles per wing  
-2.75" Rocket Pods (APKWS, GATR or other guided rockets); one pod per wing

Datalinks provide Line-of-sight (LOS) and Beyond-Line-of-Sight (BLOS) audio and visual communications

Missile Warning and countermeasures system for a full range of threats

### **Facts At A Glance**
