

THE VALUE OF PERFORMANCE.

NORTHROP GRUMMAN

Smokeless Gunpowder

Northrop Grumman's New River Energetics has a proud history of producing high-quality, high-performance gun powder used by shooting and hunting enthusiasts around the globe. Our smokeless double-base powder, made with a blend of nitrocellulose and nitroglycerin, provides consistently superior ballistic performance. We offer a wide variety of smokeless double-base powders that are available in tailorable formulations based on cartridge type.

Applications

Our OEM powder can be found in many major brands of shotshell, pistol and rimfire ammunition. We also manufacture and bottle powder for use in the consumer reloading market and import high performing rifle powders for U.S. distribution.

Product Features and Benefits

- Excellent lot-to-lot consistency
- Currently available in 175 variations
- Tailorable formulations meet a variety of cartridge loads
- Powder for both OEM and consumer reloading markets
- Hazmat transportation logistics
- International distribution
