

HealthIT

***Fraud
Prevention
System (FPS)***

Solution:

Centers for Medicare and Medicaid Services' predictive analytics system used to analyze Medicare claims to detect patterns that present a high risk of fraudulent activity, and enables CMS to employ real-time, pre-payment claims analysis to identify emerging trends of potential fraud

THE VALUE OF PERFORMANCE.

NORTHROP GRUMMAN

Fraud Prevention System (FPS)

Significantly reduces overall Medicare fraud potential in an effort to save CMS millions of dollars annually

- The system generates real-time alerts for claims that warrant further investigation and review by the Agency and other stakeholders. Northrop Grumman successfully deployed the system within 60 days
- The information regarding the identified claims and providers is compiled into a comprehensive national online case management system for further review
- System size:
 - 42 million beneficiary profiles
 - 2 million of provider profiles
 - Millions of claims processed daily
