The National Environmental Public Health Tracking Network

Solution:
A standards-based, integrated environmental public health tracking surveillance system at the state and national level.
The National Environmental Public Health Tracking Network allows linking and reporting health effects data with human exposure and environmental hazard data.

- Collects, integrates, analyzes, and disseminates data from environmental hazard monitoring, human exposure and surveillance
- Combines data and provides information on environmental exposures, adverse health conditions
- Enables data reporting and linking across health effects, exposure, and hazard data to interoperate with public health systems
