

We're moving technology forward to **TAKE OUR PLANET BACK.**

It's not a job, it's a mission. On our team, you'll help develop complex satellites, unmanned aircraft, and ground systems that enhance our knowledge of global weather and environmental trends. You'll contribute to advanced sensor technology that measures and forecasts climate change. You'll join 75,000 collaborators whose expertise is as varied as our perspectives. And you'll be supported by training, employee resource groups, and our shared vision of global security.

Across our career areas and around the globe, we see the value of our performance every day. We are Northrop Grumman. And a healthy planet is **at the heart of what we do.**
