

KEI Land To Sea

Versatility... Load & Go

KEI's Common AUR Adaptable Launcher enables boost, ascent, and mid-course intercepts on multiple platforms

• Land-Mobile • Sea-Mobile • Submarine

Northrop Grumman's KEI Common AUR provides the affordable transition from land to sea-mobile KEI

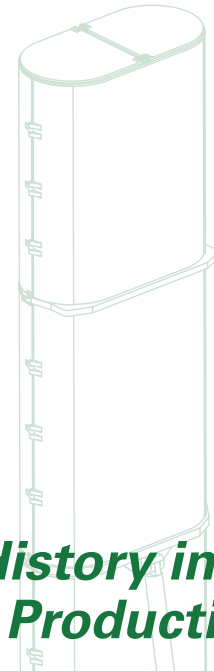

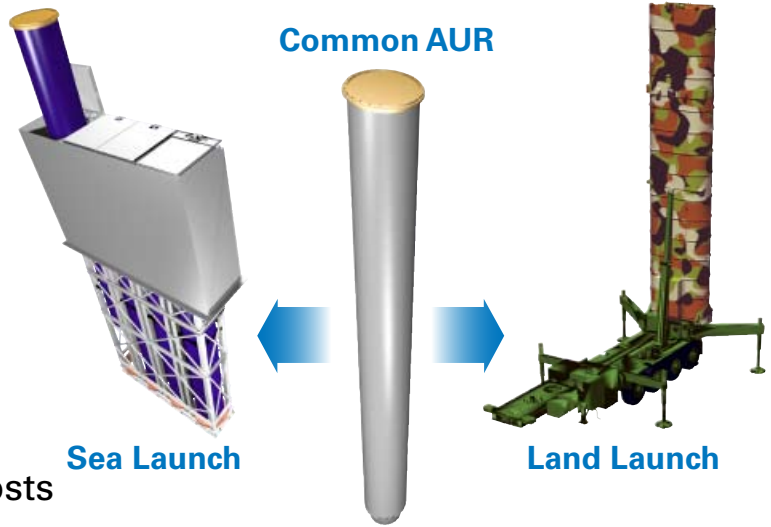

NORTHROP GRUMMAN

DEFINING THE FUTURE

KEI

Commonality and Modularity from the Start

- Common Canister—ensures common interfaces for all platforms and reduced development and life-cycle costs
- Eject Launch
 - Reduces risk associated with restrained firing and booster detonation
 - Eliminates plume impingement impact
 - Facilitates transition to surface ship and submarine platforms
- Common Launch Control—reduces development and life-cycle costs through significant software and hardware reuse
