National Level Repository (NLR)

Solution:
The Centers for Medicare and Medicaid Services’ central data repository for incentive payments made to providers who demonstrate meaningful use of Electronic Health Records
Expanded use of Electronic Health Records is expected to decrease the cost of care and increase the quality of care provided to Medicare and Medicaid beneficiaries

- The central data repository which includes a Business Rules Engine - a first at the Centers for Medicare & Medicaid Services - which is now the enterprise rules engine platform for the Agency
- Processes millions of transactions that provide payments to 300,000 eligible professionals, 1,400 institutions and 56 state agencies with Medicaid administrative oversight
