***NORTHROP GRUMMAN***

---

**N**orthrop Grumman Integrated Defence Services provides the Royal Australian Air Force (RAAF) 86 Wing, 33 Squadron with through-life support for its fleet of five Airbus A330-200s Multi-role Tanker Transport (MRTT) aircraft located at RAAF Amberley.

The MRTT represents one of the largest and most complicated aviation programs ever completed in Australia, and required more than 100,000 man hours per aircraft to complete—a job that included the conversion of a green A300-200 airliner to a KC-30A tanker.

As the only non-original equipment manufacturer to have successfully converted, completed entry into service, and implemented through-life support for the KC-30A MRTT fleet, Northrop Grumman is a proven partner to provide global integrated services to the MRTT.

These services include:

- Sustainment (through-life support)
- Entry into service
- Transport aircraft experience
- Configuration management expertise

The RAAF was the launch-customer for the MRTT. In 2007, Northrop Grumman converted four A330-200 airframes to MRTT configuration at the company's Brisbane Airport facility. The company was also a key partner in launching the RAAF's MRTT capabilities at Amberley, when 33 Squadron relocated from RAAF Richmond in 2008.

Northrop Grumman's motivated and skilled workforce of more than 100 employees provides scalable and adaptable support to meet the needs of our customers and industry partners, and has earned many civil and military accreditations, and ISO certifications.

Northrop Grumman is committed to providing our customers with timely and cost-effective capability. The company delivers 100 percent daily flying satisfaction aircraft availability scores, and have completed more than 900 engineering requests and 20 surge maintenance events. Success is underpinned by positive relationships with customers and a deep understanding of their business drivers.

### **KC-30A Support**

Northrop Grumman has established a close working relationship with the RAAF and the Heavy Air Lift Systems Program Office to deliver KC-30A MRTT through-life support.

The Northrop Grumman team delivers all aspects of through-life support for the KC-30A fleet, with dedicated facilities, warehouses and infrastructure for the most cost-effective performance outcomes for the highest level of fleet availability. This is demonstrated by a 99.8 percent demand satisfaction rate for component supply, with 215 aircraft parts being supplied on average, per month.

Furthermore, the company has Authorised Engineering Organisations and Approved Maintenance Organisations designations to perform all KC-30A maintenance and engineering activities.

Northrop Grumman is a leading global security company providing innovative systems, products and solutions in unmanned systems, cyber, C4ISR, and logistics and modernization to government and commercial customers worldwide.
