

CYBERSECURITY WORKSHOP TRAINING

DFARS 204.73 / NIST SP 800-171

Northrop Grumman, in collaboration with the USC Center for Economic Development, is offering free cybersecurity training to small businesses through an Air Force Small Business Office Mentor Protégé Program.

WORKSHOP OBJECTIVES

Our one-day 8-hour workshops help ensure that small businesses are aware of the cybersecurity requirements mandated under Defense Federal Acquisition Regulations Supplement (DFARS) Subpart 204.73. We focus on understanding the risks associated with safeguarding controlled unclassified DoD information.

The workshops focus on the groups of controls from NIST SP 800-171, with examples highlighting what happens when these controls are not implemented. By the end of the workshop, you will become familiar with all 110 controls and be able to better identify the areas where you may need greater focus to meet the DoD's cybersecurity expectations. We hope you'll join us.

FREE AND OPEN TO ALL U.S. BUSINESSES. ADVANCE REGISTRATION IS REQUIRED.

You may attend a workshop in person or online. The workshops are located all across the country in a variety of venues, while also being broadcast live as an interactive webinar for online attendees.
