For hazardous material(s) not on this list, or with a restricted status, the contractor must:

- 1) Submit a Northrop Grumman Contractor Hazardous Material Request Form (K0-F038) with the most current material Safety Data Sheet (SDS) to the Northrop Grumman Facilities Project Engineer (FPE) for Environmental, Health and Safety (EHS) review.
- 2) Receive notification by the Northrop Grumman Facilities Project Engineer of the status prior to bringing any hazardous material on site.
- 3) The contractor is responsible for using materials in a manner consistent with the specified status/restrictions.
- 4) Ensure the SDS is readily available to the users at all times on the job and
- 5) Place the NG Supplier Hazardous Material label (blue/white sticker) on the container indicating the contractor name and the Chemical Review Process number (CRP#).

Contractors not following the above requirements are subject to a project halt by a Northrop Grumman representative.

Unless otherwise noted, chemicals approved or approved with restrictions at Space Park are limited to a maximum of 100 pounds. Quantities in excess of 100 pounds will require resubmittal of Contractor Hazardous Material Request Form (K0-F038) and most current SDS for ESH review.

Contractors must comply with their Hazard Communication program, wear appropriate personal protective equipment (PPE) as specified in the SDS and use the product in an area with adequate ventilation (away from ventilation intakes if used outdoors) to control Northrop Grumman employees exposure. **Questions?
