Dear Supply Chain Partners:

Coronavirus Supply Chain Impact

Northrop Grumman is closely monitoring the potential impact of the Coronavirus (COVID-19) on our communities, businesses and supply chain. Since the identification of COVID-19, the impacts have extended beyond manufacturing sources in China. As the proliferation of the virus has expanded globally, risk areas of potential impact have also grown across many industries and geographic regions.

We are continually assessing the operational needs of our businesses and remain committed to meeting our customer commitments for products, services and solutions. As a valued supplier to Northrop Grumman, we ask that you perform the required due diligence to ensure that your business, inclusive of your vertical supply chain, is not expected to experience a disruption. **In the event you experience or believe there may be a possible impact to your business, your supply chain at any tier, deliverables or schedule, please contact your local Northrop Grumman supply chain administrator as soon as possible.**

Please also note that in order to promote a safe environment, anyone visiting a Northrop Grumman facility, including suppliers or contractors, will be asked to complete a health and travel questionnaire. Any visitor that has travelled to any of the countries identified in the questionnaire, or that has recently experienced flu-like symptoms, will be asked to either attend the meeting virtually or reschedule. For questions or additional details, please contact your Northrop Grumman supply chain administrator.

Northrop Grumman values the health, safety and well-being of you and your family members. We continue to monitor for the latest guidance from the U.S. Centers for Disease Control (CDC) and the World Health Organization (WHO) and encourage that you do the same. If you have any questions, please visit www.northropgrumman.com for more information, or contact your local Northrop Grumman procurement office for assistance.

Thank you for your collaboration and continued support.
