

Kevin Carroll

*Director, Advanced Propulsion and Systems
Northrop Grumman Defense Systems*

Kevin Carroll is Director of Manufacturing Operations for Northrop Grumman's Missile Products Business Unit within the Weapons Systems Division.

In this role, he is the site lead for the Ronkonkoma, NY, Facility. His areas of responsibility include test operations, quality management, government property, material handling, facility engineering and environmental health and safety.

Prior to Northrop Grumman's 2018 acquisition of Orbital ATK, Carroll was a 14-year veteran of ATK, which merged with Orbital Sciences in 2015 to become Orbital ATK. During this time, he held the position of senior manager operations providing leadership and oversight of all manufacturing and testing activities in the Ronkonkoma, NY, facility.

Carroll also served as senior manager operations for Allied Aerospace Industries Inc. (A2I2) and was responsible for design of test support hardware for Pratt and Whitney, NASA and the USAF, as well as the machine shop manager and program manager for Ground Demonstrator Engine 2 and Single Engine Demonstrator program. He also served as a design engineer and project manager for Lockheed Martin.

Carroll holds both a bachelor's of science degree in mechanical engineering degree from Clarkson University and a master's of business administration degree from Dowling College. He also holds a Certification in Program Management Professional (PMP) and is a Six Sigma Green Belt
