

Northrop Grumman in the UK joins Elastic Partner Programme to deliver enhanced software capabilities

London, United Kingdom – November 13, 2020 – Northrop Grumman in the UK announced this week that it has joined the Partner Programme of [Elastic](#), the leading search and data analysis company.

Elastic's powerful solutions to search documents, monitor infrastructure and protect against security threats combined with Northrop Grumman's expertise to customise, optimise and integrate Elastic's suite of products provide our UK clients with unique tailor-made solutions.

This partnership provides UK clients the ability to access clear benefits of integrated and enhanced product sets, with advanced functionality baked in. Northrop Grumman has proven experience in developing and managing enterprise-scale observability and search capabilities for government customers.

Richard Morgan, Director Cyber & Intelligence, at Northrop Grumman said "This partnership between Northrop Grumman UK and Elastic really does provide clients with the best of both worlds; cost effective COTS solutions with a framework of additional services. The result: customised, scalable and secure solutions solving Government clients' requirements for fast, secure, shared and managed data storage."

Northrop Grumman in the UK's team now has the sovereign capability to customise Elastic's COTS software to meet requirements across a suite of Government organisations.
